Applications

The F-Series Modular Actuator is designed to be engine-mounted for various position control functions on reciprocating engines used in industrial and on-highway service. Position control application examples can include fuel rack positioning, throttle valve positioning, waste-gate valve positioning, as well as other engine position control functions.

The F-Series Modular Actuator software must be properly set up for the application. Refer to manual 26355 for detailed instruction.

Description

The F-Series Modular Actuator is an electric bi-directional actuator with an integral driver. The actuator accepts a position demand signal from a master controller and drives the 0–70 degree output shaft to the demanded position based on an internal shaft position sensor. The actuator can accept a PWM, J1939 CAN, 4-20 mA, or 0-5 V position demand signal. The electric actuator requires no hydraulics, pneumatics, or gear train.

The CANbus protocol is SAE J1939.

The high-efficiency torque motor delivers 1.4 N·m (1.0 lb-ft) steady-state torque and 2.7 N·m (2.0 lb-ft) transient torque at 105 °C, 12 Vdc.

The directions of shaft rotation (CW or CCW) and shutdown (0% or 100%) are configurable.

The Service Tool software includes an Auto Find Mechanical Stops feature and an Auto Inertia Test feature to simplify scaling the actuator to the systems mechanical stops and setting the position control dynamics.

For status purposes, a relay driver output is provided that changes state whenever the controller experiences a configured fault or error condition.

A configurable 0–5 Vdc position feedback signal (TPS) is available for monitoring the actuator output shaft position and for potential feed-forward control.

Discrete inputs are provided for a Run Enable/Key Switch and to set the CAN ID.

The F-Series actuator operates on 10–32 Vdc. The ambient operating temperature range is –40 to +105 °C (–40 to +221 °F).
Installation

### Performance

- **Positioning Accuracy**: ±4% full stroke for all input types after effects from –40 to +85 °C board temperature
- **Overshoot**: < 2%
- **Bandwidth**:
  - >= 10 Hz at –3 db, ±0.5% of full scale
  - >= 14 Hz at –3 db, ±2% of full scale
- **Steady State Limit Cycle**: < 0.25 degree p-p (at 12 Vdc, room temperature, no external load)

### Environmental

- **Amb. Oper. Temperature**: –40 to +105 °C (–40 to +221 °F)
- **Storage Temperature**: –40 to +125 °C (–40 to +257 °F)
- **EMC**:
  - EN61000-6-2 (2005): Immunity for Industrial Environments
  - EN61000-6-4 (2001): Emissions for Industrial Environments
- **ISO 10605 (2001)**: ESD Immunity for Packaging and Handling, ± 4 kV contact discharge
- **ISO 11452-4 (2005)**: Conducted RF Immunity (BCI method), 1 MHz – 200 MHz, 100 mA induced current
- **ISO 11452-2 (2004)**: Radiated RF Immunity, 200 MHz – 1 GHz @ 100 V/m, 1 GHz – 2 GHz @ 30 V/m
- **CISPR 25 (2002)**: Radiated RF Emissions, 30 MHz – 1 GHz, 2004/104/EC and ECE Regulation 10 limits
- **ISO 7637-2 (2004)**: Conducted Transient Immunity, Pulse 1c, 2a, 3a, 3b, 4, and 5a
- **Humidity**: US MIL-STD 810D, 507.2, Procedure III (60°C, 95% RH), Lloyd’s Register of Shipping Humidity Test 1 and Det Norske Veritas Damp Heat per Woodward Procedure 4-04-6230
- **Salt Fog**: SAE J1455, 4.3
- **Dust Exposure**: SAE J1455, 4.7
- **Chemical Resistance**: SAE J1455, 4.4.3 (except water immersion testing)
- **Shock**: 40G, 11 ms duration saw-tooth pulse Per Woodward Procedure 3-04-6231, MS1
- **Vibration**: Random: 0.3 G²/Hz, 10–2000 Hz (22.1 Grms) 3 h/axis per Woodward Procedure 3-04-6231, RV3
- **Drop Test**: SAE J1455, Section 4.10.3.1
- **Thermal Shock**: SAE J1455, 4.1.3.2. Modified, –40 to +105 °C and 20 cycles
- **Ingress Protection**: IP56 per IEC 60529, (dust ingress, water ingress)
- **Immersion and Splash, Steam Cleaning and Pressure Washing**: SAE J1455, 4.4.3 (submerged, frozen, thawed)
  - SAE J1455, 4.5 (steam cleaning and pressure wash)

### Technical Manual

26355
Regulatory Compliance

European Compliance for CE Marking:
These listings apply to stationary industrial markets only and are limited only to those units bearing the CE Marking.

Other European and International Compliance:
Compliance with the following European Directives or standards does not qualify this product for application of the CE Marking.

North American Compliance:
These listings are limited only to those units bearing the CSA identification.

Type 3R Enclosure Rainproof

This product is certified as a component for use in other equipment. The final combination is subject to acceptance by the authority having jurisdiction or local inspection.
