Demand for fuel-efficient, low-emission, high-performance energy drives our business. At Woodward, we integrate our technologies into fuel, combustion, fluid, actuation, and electronic systems for original equipment manufacturers and equipment packagers.

Our customers use Woodward systems and components for controlling engines, turbines, and associated equipment in the power generation, transportation, process industries, and aerospace markets.

"When somebody thinks of energy control technology, we want them to think of Woodward first – we want them to know that Woodward is setting the global standard."

- Thomas A. Gendron, President and CEO

We are focused on accurately and precisely controlling energy by integrating our components into systems that improve the emissions performance, reliability, and fuel efficiency of our customers’ products, helping ensure a better environment.
Focused on
GLOBAL MARKETS

The global markets are constantly changing. Woodward is well positioned to adapt our technologies to customer needs throughout the world. With more than 4,000 members in locations worldwide, we reach our customers through a growing network of manufacturing, sales, and service facilities, as well as a group of authorized distributors.

We implement our carefully planned growth strategies throughout the company. We are expanding our systems solutions, acquiring complementary technologies, aggressively pursuing market adjacencies within our competencies, and strengthening our aftermarket product and service offerings.

Exceptional Processes
EXCELLENT RESULTS

Engineered and manufactured under precise attention and detail, Woodward’s energy control systems and solutions are built for exceptional performance. We pursue excellence in quality, delivery, responsiveness, and cost in all of our processes.

We apply Six Sigma, lean manufacturing, and continuous improvement principles throughout our business to meet customer expectations by delivering quality systems and products on time. By partnering with suppliers who share our business goals and expectations, Woodward sets the standard for process excellence to guarantee our products’ exceptional performance.
Talented and motivated individuals join Woodward for the challenges and opportunities offered. Woodward fosters an environment of growth, accomplishment, and satisfaction, which helps us develop our workforce and meet our business objectives. Our members embrace the ethics, initiatives, and teamwork on which we proudly stand.

Customers and the industry at-large recognize our people as a competitive advantage through their diverse representation of the global community. Additionally, as a company and as members, we respond to the needs of our communities by donating time, talent, and money.
Our leadership in energy control and optimization solutions is built on a foundation of strategic vision, quality performance, and core values, dating back to 1870. We build on our proven successes with technologies that redefine the way our customers’ engines and turbines operate.

We are guided by our strong tradition of integrity. We hold steadfast to our core values and principles. We are driven by the needs of our customers. We are aligned by our strategic vision and goals.

It’s what we call the Woodward Way. It’s how we’ve become the global leader in energy control and optimization solutions.

Woodward – controlling the power of energy.
